1. Use as a Stabilizer
   Backing for Machine Embroidery, Applique and Monogramming...
   by placing Cut-Away Soft 'n Sheer in the hoop under the fabric design area to be stitched. For other non-hoop applications, pin or baste the material to Soft 'n Sheer. Ideal for lightweight woven or knit fabrics, and for sheer fabrics when Soft 'n Sheer is cut away close to stitching.

2. Removal is Easy...
   once stitching is completed, remove from hoop and cut away the stabilizer up to the outer edge of stitching.

3. Cut-Away
   Soft 'n Sheer ... remains under the stitching to act as a support through laundering and wearing.
   • Cut-Away Soft 'n Sheer is also available in a 3 yard package - Item # 235-03, on a 25 yard bolt - Item #235-25, an 8” roll - Item # 235-08 and a 12” roll - Item # 235-12.

Note: Soft 'n Sheer is a nylon product and will not tolerate a hot iron. Use a low temperature and a press cloth when ironing, or press from the fabric side only.

SULKY®
Cut-Away Soft 'n Sheer™
An Ultra-Soft, Permanent Cut-Away Stabilizer

SOFT’n SHEER™
Cut-Away Permanent Stabilizer
Lightweight, textured, non-woven nylon that is ultra soft next to your skin

Provides great permanent stability to stitch on lightweight knits and woven fabrics. Excellent stretch resistance eliminates pulling or sagging of the embroidery design during stitching and remains with fabric for continued stabilization through laundering and wearing.

Great for:
• Stitch Designs on Lightweight Fabrics
• Dense Embroidery Designs
• Open-Weave Fabrics
• Lightweight Sweater Knits
• Free-Form Embroidery
• T-Shirt Knits
• Organza

• Netting
• Lightweight Rayon and Synthetic Fabrics
• Lycra

WEIGHT: Light
COLOR: White
SIZE: 20” x 36”

Instructions Included
Item no. 235-01
Depending on the density of your fabric and embroidery design, you may need one to three layers of Soft ‘n Sheer. It is less noticeable under more transparent fabrics.

2. Carefully cut away excess stablizer without cutting the fabric it is stabilizing; IT WILL NOT TEAR AWAY like most other Sulky Stabilizers. It is permanent through washings, acting as a permanent support for the thread.

3. Cut-Away Soft ‘n Sheer is ultra-soft next to the skin.

4. Be flexible and experiment with different combinations on different weights of fabric. You may need to use one to three layers of Soft ‘n Sheer depending on the type of fabric and density of the stitching. Sometimes using Soft ‘n Sheer in conjunction with another Sulky Stabilizer does the best job.

General Information - *Press flat before using.*

1. Cut-Away Soft ‘n Sheer Stabilizer is a texturized, non-woven nylon backing that is ideal for dense embroidery designs, open-weave fabrics, or complex designs on lightweight knits and wovens. Soft ‘n Sheer is less noticeable under more transparent fabrics.

*Sulky Cut-Away Soft ‘n Sheer is perfect for Computerized Embroidery & Applique Work*

Depending on the density of your fabric and embroidery design, you may need one to three layers of Soft ‘n Sheer. It is always best to do a test to determine what set-up works best for the combination of fabric and embroidery design you are working with. Place one layer of Soft ‘n Sheer in the hoop under the fabric, and any additional layers under the hoop. Or try adhering Sulky Sticky to the back of the hoop, then placing Soft ‘n Sheer under the hoop to create a more permanent situation for support during laundering that will also feel soft next to your skin.

Use Sulky Decorative Threads to embroider your design following sewing machine manufacturer’s instructions.

When stitching is completed, clip away all loose bobbin threads, then cut away excess stabilizer. The stabilizer inside the stitched design will remain to act as a permanent stabilizer to support the embroidery through washings.

Press out hoop marks if there are any.

Look for these other great Sulky Stabilizers:

**SULKY SOLVY™ - A LIGHT WEIGHT Water Soluble Stabilizer**
The perfect topper when embroidering to keep stitches from sinking into fabric like sweater knits and fleece, and to hold down toweling nap. Use it to make exquisite lace or faux ribbon woven fabric, monograms, open weave scarves, 3-D applique and more! Transfer a design with it or make it into liquid stabilizer.

**SULKY SUPER SOLVY™ - A HEAVIER WEIGHT, Denser Water Soluble Stabilizer**
Ideal for heavy cut-work, decorative edge stitching, making heavily stitched lace fabric, open work, large block monogramming, transferring a design, 3-D applique, turning appliques and more!

**SULKY HEAT-AWAY™ - A HEAT DISINTEGRATING Brush-Away Stabilizer**
Firm like muslin. Ideal for edge work, making lace and more! Cut away excess, then iron-away remaining with a dry iron and press cloth. Perfect for applications where water can’t be used.

**SULKY TOTALLY STABLE™ - An IRON-ON Tear-Away Stabilizer**
Ideal as a backing to stabilize knit and stretch fabrics when appliqueing, monogramming, embroidering and doing Charted Needlework. Use as a pattern copy paper or as a quilt piecing template. Can be re-ironed several times. When torn away, it leaves no sticky residue.

**SULKY TEAR-EASY™ - A LIGHT WEIGHT Tear-Away Stabilizer**
Ideal as a backing stabilizer. Use as many layers as needed for support, then easily tear away one layer at a time. Using Tear-Easy prevents the pulling, tearing or distorting of delicate straight stitching when removing it from embroidered designs that have both satin stitching and straight stitching.

**SULKY STIFFY™ - A HEAVIER WEIGHT, Firm, Crisp Tear-Away Stabilizer**
Ideal as a backing stabilizer when more stability is needed. Use as many layers as needed for support, then tear away one layer at a time. Combines great stability with effortless removal.

**SULKY STICKY™ - A PAPER-BACKED, SELF-ADHESIVE Tear-Away Stabilizer**
Ideal as a backing stabilizer when doing computerized embroidery, especially when embroidering small pieces of ribbon, fabric, caps, etc. that do not fill a hoop. Excess tears away easily.

**SULKY CUT-AWAY™ PLUS - A MID-WEIGHT, DENSER Permanent Stabilizer**
Ideal as a backing stabilizer when doing computerized embroidery with dense thread coverage on Jackets and outerwear. Cut away excess close to stitching. Acts as a permanent stabilizer to support the embroidered area through washings.
