

STICKY +™

Self-Adhesive, Tear-Away Stabilizer

The ideal stabilizer for hooped, computerized machine embroidery

Acid Free

Use Sticky + in or under your hoop and eliminate hoop marks on all fabrics. Great to hold small areas like pockets, edges, button rows, ribbon, cuffs, collars, socks, doll clothes, etc. without basting them. Just peel off the paper-backed release sheet and apply. No heat required.

SULKY®
Create with Confidence™

Great For:

- Knit Fabric
- Caps
- Ultra Suede
- Velvet
- Brushed Velour
- Brushed Denim
- Sweatshirt Fleece
- Silk
- Flannel
- Nylon
- Doll clothes
- Pockets
- Cuffs & Collars
- Socks
- Ribbon

COLOR: White

SIZE: 21-1/2" x 36"

Instructions Included
Item no. 551-01

Tips on using Sulky Sticky+™

When stitching Computerized Embroidery Designs:

1. Hoop Sulky Sticky with the paper side up, the way you would hoop a piece of fabric. Using a small sharp knife or straight pin, score the paper and pull it away from the adhesive layer. Then finger press your fabric to the Sticky. Attach the hoop to the embroidery machine. If more support is needed for flimsy or unstable fabrics, place a layer or two of *Sulky Tear-Easy Stabilizer* under the hoop, and embroider. For best results remove excess Sticky from fabric within several hours of application.
2. Another way to use Sulky Sticky is to use only the outer portion of the hoop for your embroidery machine. Peel off and discard the paper release sheet backing from the Sticky and affix the adhesive side to the bottom of the outer portion of your hoop. Place your fabric on the hoop and finger press to adhere it to the Sticky. Put the hoop on your embroidery machine. If more support is needed, place a layer or two of *Sulky Tear-Easy Stabilizer* under the hoop, and embroider. For best results remove excess Sticky from fabric within several hours of application. To remove any adhesive buildup on embroidery hoop use Goo-Gone™. Available at most fabric and hardware store.
3. When embroidering small items, you won't have to baste them to the Sticky. Just finger press them onto Sticky. Fast and easy!
4. Sticky also makes Ready-to-Wear much easier to embroider. Areas like cuffs, collars and socks can be finger-pressed to the Sticky and embroidered without any additional preparation. For best results remove excess Sticky from fabric within several hours of application.
5. If Sticky is used to stabilize sweatshirt fleece or fuzzy knits for any type of embroidery or applique, when you remove the excess within several hours of application, the Sticky will not pull the fuzz off the fleece like conventional iron-on stabilizers can.
6. Because you don't use the inside half of the hoop to hold the fabric to be embroidered, you won't crush or leave a hoop mark when embroidering on napped fabrics like Ultra Suede, velvet, brushed flannel, corduroy, toweling, etc. Just adhere Sticky to the back of the larger hoop that attaches to the machine and finger press the fabric onto the *Sulky Sticky Stabilizer*. Try pinning *Sulky Solvy Water Soluble Stabilizer* onto the top of the fabric to hold the nap out of the stitching. For added support try one or two layer of *Sulky Tear-Easy Stabilizer* under the hoop. You are ready to embroider the professional way! For best results remove excess Sticky from fabric within several hours of application.
7. For hand work projects like Counted Cross Stitch, Silk Ribbon Embroidery, Hand Embroidery, etc., when fabric isn't large enough to fit in the hoop, affix Sulky Sticky to outer edges of fabric to make them larger. Also, protect the outside edges of canvas by folding Sticky over them.

Read this information before using!

1. It is best if most fabrics are not in contact with the adhesive on Sticky+ for more than one hour. This is particularly important on slippery, satin-like fabrics.
2. Temperature extremes will affect Sticky+. The product performs best if used in a 60 to 80 degree environment. Warmer weather and higher humidity can cause increased bonding. Cold weather may reduce bonding.
3. Sticky+ is engineered not to stick to needles. Temperature extremes can affect this. Certain fuzzy fabrics and fabric sizings can cause gumming of the needle. Clean a gummed needle with acetone.
4. ALWAYS TEST on a small swatch of the intended fabric before proceeding with the project.
5. Not recommended for use on the right side of the fabric except for momentary tracing when using as a template.

NOTE: Remove excess Sticky completely before applying heat from an iron or clothes dryer.

Try these other quality Sulky Stabilizers

SOLVY[™]

Water Soluble Stabilizer

The perfect stabilizer and transfer agent that dissolves in water

NEEDS WASH-AWAY

Mix Solvy with water 1:1000 and use either the Solvy Wash-Away or Solvy Soak. Acid Free

Sulky[®]
Create with Confidence[™]

The Original Sulky Solvy lightens light water soluble stabilizers. Use as a design transfer, as a pattern guide and as a cloth support piece. Ideal when you do not want any stabilizer to show on top or bottom.

Great For:

- Embroidery
- Monogramming
- Thread Stabilizing
- Quilting
- Applique
- Lace Work
- Bridging
- Buttonholes
- J-D Work
- Edges

- Shadow Work
- Cut Work
- Machine Sewing and Serging

WEIGHT: Light
COLOR: Transparent
SIZE: 11" x 11" x .30"

Instructions Included
Item No. 301-01

TEAR-EASY[™]

Soft, Lightweight, Tear-Away Stabilizer

Provides great stability combined with effortless removal that doesn't pull, tear or distort stitches

NEEDS WASH-AWAY

Acid Free

Sulky[®]
Create with Confidence[™]

Professional Embroiderers use one, two or three layers to stabilize virtually any fabric. Each layer is then easily and safely removed to prevent the pulling or distorting of stitches.

Great For:

- Applique
- Buttonholes
- Decorative Stitching
- Commercial Embroidery
- Quilting
- Edge Work
- Monogramming
- Seam Stabilizing

- Stability of Delicate Fabrics
- Transfer Agent
- Thread Stabilizing

WEIGHT: Light
COLOR: White
SIZE: 20" x 20"

Instructions Included
Item No. 301-02

TOTALLY STABLE[™]

Iron-On, Tear-Away Stabilizer

Totally stabilize virtually any fabric in seconds with no time-consuming pinning

NEEDS IRON-ON TEAR-AWAY

Use one or more layers. For best results, press thoroughly to avoid air bubbles. Acid Free

Sulky[®]
Create with Confidence[™]

Eliminate annoying shifting, sliding and puckering of fabric. Excess then tears away easily, leaving no sticky residue.

Great For:

- Applique
- Monogramming
- Decorative Stitching
- Fabric Stampings
- Buttonholes
- Starched fabrics

- Chirped Needlework
- Patch Needs
- Stability on Delicate Fabrics
- Transfer Agent
- Quilt Templates

COLOR: White
SIZE: 20" x 20"

Instructions Included
Item No. 301-01

HEAT-AWAY[™]

Brush Off Stabilizer

Special heat-sensitive woven fabric that disintegrates with a hot iron then brushes away easily

NEEDS HEAT-AWAY

Do not allow heat or moisture to come in contact with this fabric until the stabilizer is removed. Acid Free

Sulky[®]
Create with Confidence[™]

Sulky Heat-Away is perfect to use when nesting or tracing would cause distress to stitches or damage to fabric. Heat-Away can be used for tracing, transferring and stabilizing.

Great For:

- Decorative Stitching
- Monogramming
- Buttonhole Lays
- Cut Work & Edges
- Lace Work
- Buttonholes

- Machine Embroidery
- J-D Applique
- Special Effects
- Delicate Fabrics
- Denim & Velvet

WEIGHT: Light
COLOR: White
SIZE: 11" x 11" x .30"

Instructions Included
Item No. 301-01

Use Sulky Sticky+™ for Computerized Machine Embroidery

Sticky eliminates
"hoop-mark" problems

- 1. Hoop Sulky Sticky**
with the release paper side up,
the way you would hoop a piece
of fabric.

*Note: See "Tips" inside for an
alternate method of affixing
Sticky to underside of hoop.*

- 2. Score the paper
release side**
with a small knife
or straight pin.

- 3. Peel off the
release sheet.**
Self-adhesive, non-woven
Sticky is now exposed
and ready for the
garment or piece to be
affixed for embroidering
by machine.

- 4. Place the garment
or piece to be
embroidered over
the hoop;**

position as desired with grain
line straight. Finger press to
smooth in place. Fabric can
be removed and repositioned
several times before Sticky
will no longer hold.

- 5. Attach the
embroidery hoop**

to the machine and
embroider according to
manufacturer's instructions.

*Note: When using Sticky, the
inside ring of the hoop is not
used over the fabric.*

- 6. After embroidery
is completed,
gently tear away
the fabric from
the Sticky.**

When the embroidery is
completed, you can actually
"patch" the Sticky in the area
that was removed with a
scrap piece of Sticky a little
larger than the hole. Place the

garment or fabric for the next embroidery without removing the
entire piece of Sticky from the hoop. You can continue in this
manner until the Sticky no longer holds. At that time, hoop a
new piece of Sticky as in 1 through 5. Always remove excess
Sticky before applying heat from an iron or clothes dryer.

*Sticky+ is also available in an 8" roll - Item # 551-08,
a 12" roll - Item # 551-12, a 16" roll - Item # 551-16
and on a 25 yard bolt - Item # 551-25*
