

ULTRA SOLVY™

Water Soluble Stabilizer

*The perfect stabilizer and transfer agent
that dissolves in water*

BONUS!
*Sticks To Fabric
When Moistened*

*Make Ultra Solvy a liquid
stabilizer and save money
over bottled brands.*

Directions inside.

Acid Free

SULKY®
Create with Confidence™

*Four times as firm, thick, heavy and
strong as the Original Sulky Solvy. Use
this extra heavy water soluble
stabilizer as a stitching support for
computerized lace embroidery and
decorative stitch sewing. Use as a
design template or as a pattern guide.*

Great for:

- Hoopless Embroidery
- Monogramming
- Thread Sketching
- Quilt Patterns
- Appliqué
- Lace Work
- Bridging
- Buttonholes
- 3-D Work
- Edges
- Shadow Work
- Cut Work
- Spun Lace
- Richelieu
- Scarves

WEIGHT: Heavy

COLOR: Translucent

SIZE: 19-1/2" x 36"

*Instructions Included
Item no. 408-01*

General Instructions

1. Use Ultra Solvy for any project where you want added support or a firmer working foundation than you would get with Original or Super Solvy.

2. Use only on fabric that can be wet without staining. Always test first.

3. To make an even firmer foundation, adhere two layers of Ultra Solvy together by moistening one layer with a damp sponge and smoothing layers together. **Ironing not recommended.**

4. Write or draw on Ultra Solvy to make a design or quilt pattern to follow. If working with white or pastel thread colors, use a pastel marker.

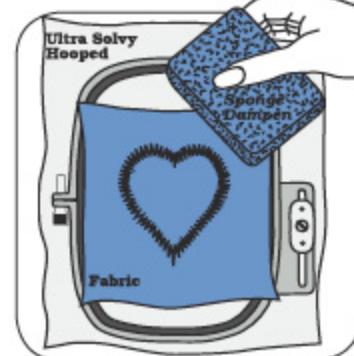

5. You can sandwich *any* fabric between 2 layers of Ultra Solvy for maximum stabilization.

6. To remove. Pull away excess Ultra Solvy and save scraps to make a liquid stabilizer. Ultra Solvy will take longer to dissolve than Original Solvy since it is 4 times denser. Submerge the project in warm water for 10-15 minutes then rinse it repeatedly; or fill up your washing machine with clear water, add the project and agitate for 5 minutes or so. Remove and lay flat to dry. Add laundry and soap to washing machine - no wasted water.

7. If you plan to do more stitching on the project and think some added support may still be needed, do not rinse out all of the stabilizer; let some remain to act as a liquid stabilizer until additional stitching is finished.

Use Ultra Solvy for Hoopless Computerized Embroidery

1. Secure Ultra Solvy in a hoop.
2. Moisten top with a damp sponge and smooth fabric over it.
3. Let dry. Ultra Solvy may relax somewhat and you may need to retighten it in the hoop.
4. Embroider.
5. Remove stabilizer following steps 6 & 7 above.

Use Ultra Solvy for any heavy application of thread like free-motion, machine fed, or computerized embroidery

1. Secure Ultra Solvy in a Free-motion Embroidery Hoop or Computerized Machine Embroidery Hoop, or use without a hoop by placing fabric to be stitched between two larger layers of Ultra Solvy. Secure them together by lightly moistening with a sponge & smoothing layers together.
2. Follow instructions to create the technique desired.
3. Remove Sulky Ultra Solvy as suggested in #6 & #7 on previous page.

Ideas for using Ultra Solvy only as a backing stabilizer behind fabric or cord:

- Computerized Lace
- Support for Buttonholes
- Support for Edgings
- Eyelets and Shisha Mirrors
- Stitching Sulky Covered Cording

Ideas for using Ultra Solvy only as a design pattern topper over a fabric base:

- Free-motion Quilting/Thread Sketching
- Holding Down Yarn when Couching
- Machine Beading
- Free-Motion Monogramming
- Layered Collage Work
- To hold down Toweling Nap in Computerized Embroidery

Ideas for using Ultra Solvy as both a design pattern and a backing stabilizer with fabric sandwiched between:

- Cut Work • Making Spun Lace & Faux Woven Fabric
- Support for Edgings
- Machine Embroidery on delicate Fabrics
- 3-D Fabric or Embroidered Appliques

Because Ultra Solvy is an extremely stable water soluble stabilizer, you only need ONE LAYER for the pattern and the backing stabilizer for:

- Making Spun Lace Fabric
- Floating Thread Designing
- Making Thread Painted 3-D Appliques
- Needleweaving
- Bridging
- Scarves

To make a liquid brush-on stabilizer, save all scraps of Ultra Solvy.

Dissolve equivalent of 1/4 yd. (plus or minus) of Ultra Solvy in 8 oz. of water. Store unused portion in the Refrigerator in a labeled jar with the lid on tight.

Design Tracing for Thread Sketching

3-D Applique

Battenburg Lace

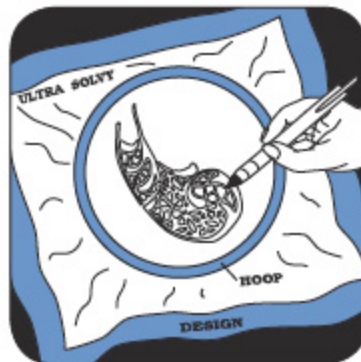

Ultra Solvy™

Firmest Water Soluble Stabilizer

*How to use Ultra Solvy for Tracing,
Transferring & Stabilizing*

1. To Trace or Transfer

a design onto Ultra Solvy, place the design under Ultra Solvy (secured in a hoop for handling ease) and trace it with an extra-fine, permanent marker, or a washout or disappearing ink marker depending on color of thread and fabric to be used. Use as a design template to stitch through to transfer a design onto fabric as in Quilting, Monogramming, Thread Sketching and Lace Making, or as a pattern guide and stitching support piece as in Cut-Work, Battenburg Lace, Bridging, 3-D Thread Applique, Computer Lace and Shadow Work Applique.

2. Use as a Stabilizer ...

under fabric or design area to be stitched by either securing in a hoop or pinning. Or brush it on as a liquid stabilizer made by dissolving 1/4 yd. in 8 oz. of water.

3. Removal is Easy ...

once stitching is completed, carefully cut away excess Ultra Solvy. Any Ultra Solvy that remains can be removed by submerging project in warm water for 10-15 minutes and rubbing lightly. Rinse thoroughly several times. Air dry on a towel.

• Ultra Solvy is also available in
a 3 yard Package - Item # 408-03, on a 25 yard Bolt - Item #408-25,
an 8" Roll - Item # 408-08, or a 12' Roll - Item # 408-12.

• Ultra Solvy is Non-Toxic.
• Store unused Ultra Solvy in a plastic zip-lock bag.
